**AGC EDUCATION AND RESEARCH FOUNDATION
PRESIDENT'S MESSAGE**

To the AGC of America Family:

This year, the Foundation will support four more faculty members, in partnership with the AGC contractors who employ them for the summer months. That brings the total number of these great experiences for faculty members and contractors alike to 19 since we started this initiative in 2011. We would like to encourage more contractors to get involved in this outstanding program. While we are obviously proud of our signature scholarship program over the past 40 years, having supported over 4,000 students with almost \$10 million in scholarships, we are aware that for each faculty internship we support, potentially thousands of students will benefit directly from the knowledge that the professors gain from real world experience!

Similarly, our industry case studies will have a great impact on students, allowing faculty and trainers to access these studies for use in the classroom to augment existing curricula. Our first case study, prepared by a team from the University of Northern Kentucky and Turner Construction, "Ethics in Project Planning and Execution," is available in the AGC Bookstore at no charge. Another case study on lean construction is in progress at Pittsburg State and this year we have awarded contracts to three new teams. Our goal is to have a library of this work available to AGC members and faculty.

Speaking of scholarships, we are delighted to announce at the 97th AGC Convention the **award of 145 scholarships** for the 2016-17 academic year. This year's recipients include a record number of graduate students, helping us to fulfill the goal of bringing more faculty into the classroom with a solid construction background. The continuing generosity of our long-time donors and the establishment of new endowments have made it possible to help these young people with the rising costs of their college educations.

In 2015 the foundation awarded the first 19 Workforce Development Scholarships for students in craft and technical programs. This new scholarship supported by the National Center for Construction and Education Research

(NCCER) allows us to make a contribution addressing the industry's workforce shortage. We are looking for more AGC members to help us by supporting this exciting endeavor. I hope you will consider becoming a contributor.

Safety has become a focus of our work in 2015. The AGC Safety Committee has worked to establish a fund to support the first-ever construction safety degree program at Keene State College in New Hampshire. Turner Construction has committed \$100,000 to support the effort. Beyond that, the Board of Certified Safety Professionals has contributed to a scholarship for students whose construction focus is safety.

The Foundation's work continues to promote the cultivation of our future leaders and to recognize outstanding work in construction education. That is our mission. We are grateful for the continued and significant financial support by AGC members and firms, the Consulting Constructors Council and AGC of America that allows us to do that. We extend a special thanks to Alliant, David Dando, Doug Maibach and Les Snyder for establishing new endowed scholarship funds in 2015, as well as the Construction Leadership Council (CLC), Bob Fay, FMI Corporation, Scott and Karen Holloway and Lee and Connie Kearney who substantially increased their endowments this past year.

We are grateful to AGC's Past Presidents, who through their generosity established a fund in honor of the late Rick Brown, whose work to support the foundation far exceeded his role as an AGC staff member for 40 years. That fund was supported as well by many of Rick's friends, family and AGC colleagues. Another fund established by colleagues and friends of Thomas Giardini, honors this past president of the Associated Construction Company and past president of AGC of Connecticut.

Join us for this exciting work! Ask one of our board members or staff director Melinda Patrician how you can help. And thanks again for your support.

Robert L. Bowen
President

MISSION STATEMENT

The AGC Education and Research Foundation shall advance and support education in the construction industry and support or contribute to scientific or research projects and programs deemed to be beneficial to the advancement of technological, educational, or vocational expertise in the industry.

THE AGC FOUNDATION WILL ACHIEVE THIS BY:

- **AWARDING SCHOLARSHIPS** to qualified undergraduate and/or graduate students enrolled at ABET or ACCE accredited schools and colleges in the field of construction or construction-related engineering who demonstrate an interest in pursuing careers in the construction industry and meet the Foundation's academic and extra-curricular criteria for such scholarships.
- **PROVIDING FINANCIAL ASSISTANCE** to support teaching faculty in the field of construction or construction-related engineering at ABET or ACCE accredited schools and colleges.
- **AWARDING FUNDING** for scientific research projects or other programs deemed by the Foundation to be beneficial to the advancement of educational, technological, or vocational expertise in the construction industry with awards based in part upon recommendations of ABET or ACCE accredited schools and colleges or other groups with special knowledge in construction or construction-related engineering.

WELCOME NEW BOARD MEMBERS

BRYAN J HUBBARD Bryan Hubbard is Department Head and Associate Professor in the Building Construction and Management (BCM) Program at Purdue University where he teaches courses in plan reading, estimating, and industrial construction. Hubbard's research interests include construction safety, industrial and nuclear construction, and workforce training. He has received research grants from the National Institute for Occupational Safety and Health (NIOSH) to further research in the area of construction safety and also from the Department of Labor to promote construction worker safety training. Prior to working in BCM, Hubbard worked at Purdue in the Civil Engineering Department and the Construction Engineering and Management Program teaching and working with industry.

Prior to coming to Purdue, he worked as an engineer in industry, with design and construction experience in the United States and Europe, including large scale projects in the power industry. Hubbard was the lead inventor on a new process for water purification and desalination in industrial cooling systems and holds two patents. He received his Ph.D. in civil engineering from Texas A& M University and his master's (MSE) and bachelor's degrees (BSME) from Purdue University, and is licensed as a professional engineer in the State of Indiana.

WELCOME NEW BOARD MEMBERS

KRIS YOUNG Kris Young is the second of three generations to work in the horizontal boring business founded by her father Gene in 1948. Kris started with the company in 1974 and was named President of Miller The Driller in 1982. Upon Gene's retirement in 2004, her son Brandon, an experienced driller in his own right, moved up to VP of Operations and Kris assumed role of CEO. Miller The Driller pioneered many of the means and methods used today in the trenchless industry. The company has installed horizontal tunnels from coast to coast using auger boring, directional drilling, and tunnel boring machine methods. Millers installed a world record 147" diameter tunnel by the pipe ramming method in 2003.

Young has been a member of the AGC of Iowa and the AGC of America for most of her career in underground construction. She's been active in many capacities including state and national committee memberships and served as President of AGC of Iowa in 1995 as well as President of AGC of America in 2011.

Kris Young has been married to Bob Young for 43 years. In addition to son Brandon, Kris has a daughter Kerrey Kyer (Kenton) and four grandchildren.

WELCOME NEW BOARD MEMBERS

STUART F. OAKES Stuart Oakes has specialized in insurance and risk management for contractors since 2007, after graduating with a degree in Finance from the University of Tennessee. He leads a team that works with over 200 contractors throughout the southeast, supporting their insurance, bonding and risk management programs. He maintains his designations as Construction Risk Insurance Specialist (CRIS).

Oakes has been involved with AGC since 2007 and has participated at the local, state and national level. He has participated in local CLC for many years and has been the leader of the local group since 2013. He joined the national CLC steering committee in 2014 and currently leads the Charitable Events and Scholarship subcommittee. He presented a CLC TED TALK at the AGC National Conference in Puerto Rico on the topic of “Controlling your Experience MOD: Thinking Outside the Box.”

Oakes was recently asked to teach a course at the University of Tennessee for the Construction Science Program called Construction Risk Management that will start this fall. He sits on the board of the Boys & Girls Club of the Tennessee Valley and is on the Advisory Council of the Friends of Tennessee Babies with Special Needs. He is a member of the Chancellor’s Associates at the University of Tennessee. Oakes and his wife, Mary Bailey, have one son (James Carmichael) who is 11 months old. They are active members of St. John’s Episcopal Church in Knoxville, TN.

CONGRATULATIONS AWARD WINNERS

DR. JUSTIN M. REGINATO | 2016 OUTSTANDING EDUCATOR

Justin M. Reginato, Ph.D., is an Associate Professor at California State University in the Department of Construction Management. He has a B.S. degree in Geological Engineering from the University of Nevada, Reno and a Ph.D. degree in Civil Engineering - Construction Management from the University of California, Berkeley. He has taught full time since 2009, previously at the University of the Pacific, and has provided his students with the outstanding instruction and passionate dedication essential to an outstanding educator. Dr. Reginato has

taken the personal initiative to further his education and gather experience outside of the classroom in order to better relate to his students through the use of real life examples and up to date information. He is lauded by colleagues and students alike and many who have witnessed him in the capacity of an educator attest to his abilities.

When deciding on a winner, the AGC Education & Research Foundation Board of Directors selects an educator who best reflects a dedication to his or her craft and has a well-developed relationship with students. Dr. Reginato has exhibited both. He has

demonstrated substantial and significant student involvement through his teaching and extracurricular activities. He has also served as an important link between students and industry through his involvement with the AGC of California and his role as an AGCERF Faculty Intern for Swinerton Builders in 2013. He currently serves as chair of the Associated Schools of Construction Industrial Relations Committee and in that role is constantly seeking ways in which to bridge the gap between the industry and academia, including serving on a panel on workforce development at this year's AGC Convention. Dr. Reginato works as the faculty advisor to multiple student associations including the AGC Student Chapter, National Electrical Contractors' Association (NECA), and the Construction Management Student Association (CMSA) of Sacramento State.

CONGRATULATIONS AWARD WINNERS

JORDAN MORAN | FIRST PLACE WINNER 2016 ALLHANDS ESSAY COMPETITION

Jordan Moran is a senior Construction Science and Management major at Clemson University. Throughout his time at school he has immersed himself in Clemson's rigorous curricula and developed meaningful relationships with his peers and educators alike in the field of construction. Moran has already completed three internships with 'China Construction of America', Mashburn Construction and Holder Construction. These opportunities have afforded him an impressive wealth of experience and depth in perspective for one that has not yet been inaugurated as a professional in the construction industry. His most recent internship at Holder Construction resulted in a job offer as a full time employee, post-graduation. Moran is enthusiastic about working in the industry and we look forward to seeing him continue this pattern of excellence in the future.

SECOND PLACE – Alex Stewart, Clemson University
THIRD PLACE – Richard Pate, Auburn University

CONGRATULATIONS AWARD WINNERS

DR. DENNIS C. BAUSMAN | ALLHANDS ESSAY FACULTY SPONSOR 2016 ALLHANDS ESSAY FACULTY SPONSOR

Dr. Dennis C. Bausman has over 35 years of experience in construction and construction education. Currently, he serves as Professor and Endowed Faculty Chair in the Construction Science & Management Department at Clemson University. Prior to joining the faculty at Clemson University, he was in large commercial contracting where he held Division and Project Management positions over a 22 year career in industry. Dr. Bausman is an AIC Certified Professional Constructor and serves as a member of the board for the American Institute of Constructors and as Chair of the Constructor Certification Commission. He has received national recognition for his work including AGC's National Outstanding Educator Award, the Associated Schools of Construction's (ASC) Outstanding Researcher Award, ASC's National Teaching Award, and the W.A. Klinger Construction Education Award for Longstanding Contribution to Construction Education and Distinguished Service to the Advancement of the Construction Profession. Dr. Bausman has conducted numerous research efforts including a study on Retainage sponsored by ASA, an investigative study on Subcontractor Default Insurance sponsored by the NASBP and ASA, and recently was involved in the development of a best practices manual for the Procurement of Professional Services Consultants commissioned by the South Carolina Department of Transportation.

Klinger Outstanding Senior Award

In memory of William A. Klinger, the first president of the AGC Foundation and one of the organizers of Iowa State University's Construction Engineering curriculum, the ISU Construction Engineering faculty selects a graduating senior, who is recognized by the AGC Education and Research Foundation for significant achievement in his or her undergraduate academic career.

ANDREW REYNOLDS exemplifies an industry-led construction engineer through several years of field experience, a community college education, and now a bachelor's degree in construction engineering. He was a regular on the Dean's List and garnered several scholarships, which led to a magna cum laude (3.86 GPA) distinction at graduation. Reynolds used his undergraduate research experience to write – as lead author – a Transportation Research Board published paper on economic haul radius as affected by diesel fuel cost. He is proud to have served AGC Iowa State University chapter as president, outstanding sophomore member, and

community service representative. Reynolds looks forward to life as a dad to his first-born and working as a project engineer for Ames Construction in the Minneapolis area.

WORKFORCE DEVELOPMENT SCHOLARSHIPS

For students entering craft training or technical programs, the AGC Education and Research Foundation, thanks to a generous contribution from the National Center for Construction Education and Research (NCCER) and its Build Your Future initiative, awarded the first 19 scholarships in the summer of 2015. We plan to expand this scholarship to offer even more craft and technical scholarship assistance in 2016!

Please consider a contribution to support this crucial initiative!

RESEARCH AND EDUCATION INITIATIVES

FACULTY INTERNSHIP INITIATIVE ENJOYS RECORD GROWTH

Each summer since 2011, the AGC Education and Research Foundation has sponsored faculty internships during which faculty members, some of them veterans in the classroom as well as in the industry, pursue continuing on-the-ground education with AGC contractors. The foundation, the contractor and the university share the cost of this experience. Since the program began, 15 internships have been successfully sponsored.

During the summer of 2016, the Foundation and partner contractors and universities will sponsor four additional faculty internships. They include:

- Victoria Chen, The Ohio State University with Messer Construction
- Javier Irizarry, Georgia Tech with Batson-Cook
- Daniel Trujillo, Colorado State University, Pueblo with GH Phipps
- Dean Wirtanen, University of Wisconsin, Stout with Market and Johnson

Applications for the summer of 2017 are available online at agcfoundation.org.
The foundation thanks the following participating contractors:

- Barton Malow
- Blach Construction
- Bowen Engineering, Inc.
- Duinink, Inc.
- Flintco Constructive Solutions
- Granger Construction Company
- Howard S. Wright
- Pepper Construction Company
- JE Dunn Construction Company
- Saunders Construction
- Shawmut Design and Construction
- Swinerton, Inc.
- Webcor Builders
- Weston Tanner

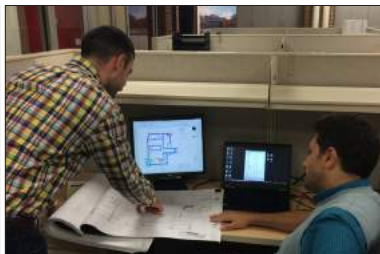

BUILDING AN INDUSTRY CASE STUDIES LIBRARY

In its quest to build a library of industry case studies available to university faculty and industry trainers, the foundation has accepted proposals from three teams to prepare case studies on varying topics. The teams chosen for the latest round of case studies are Connecticut State University/O&G Industries and Mississippi State University/Brasfield and Gorrie on aspects of pre-construction planning and Clemson University/Turner Construction on risk analysis and mitigation.

"Ethics in Project Planning and Execution," the Foundation's first case study by a team from Northern Kentucky University and Turner Construction is available through the AGC bookstore <http://store.agc.org/New-Products>.

A team from Pittsburg State University with J. E. Dunn Construction and TD Industries, Inc. of Dallas, TX is in the final stage of completing a case study on lean construction.

Many thanks to the AGC contractors and staff who generously gave their time to interview finalists for 2015 scholarships!

Many thanks to the AGC contractors and staff who generously gave their time to interview finalists for 2015 graduate, undergraduate and workforce development scholarships! Each year, AGC contractors across the country generously donate their time to interview finalists for AGC scholarships. These interviews are very important to our process of ensuring that recipients are indeed serious about a career in the industry and will be an asset when they arrive at their first job. The response from the contractors who are asked to conduct interviews is overwhelmingly positive—even more so as they meet our wonderful students, who appreciate the opportunity to interact with these industry leaders.

DONATE NOW to the *AGC Education and Research Foundation!*

Help support the future of our industry! ***YOU CAN CONTRIBUTE IN MANY WAYS:***

- ***MAKE A CONTRIBUTION*** – You can send a check or transfer appreciated stock. Individual donations of any size are welcome. Go to www.agcfoundation.org, click on the **Donate Now** button and contribute online, or have your broker transfer appreciated stock to the Foundation.
- ***ENDOW A SCHOLARSHIP FUND*** – You can support the future through a named Endowed Scholarship with a gift of \$25,000 or more. To ensure that a scholarship is given each year, we recommend an endowment of \$50,000 or more.
- ***CREATE A SPONSORED SCHOLARSHIP*** – Consider creating a Sponsored Scholarship, a commitment of \$2,500 per year to cover the cost of a scholarship for a student.
- ***CONTRIBUTE TO A DEDICATED FUND*** – The Foundation’s Faculty Internship and Industry Case Study initiatives are supported through contributions to dedicated funds created by the Foundation. If your interest lies in one of these areas, consider a contribution to one of these innovative funds.
- ***CREATE A LEGACY GIFT*** – If you are dedicated to the goal of improving the construction industry for generations to come, then leave a bequest in your will; contribute a life insurance policy; deed ownership of property; or leave a percentage of your IRA to the Foundation.

Contact Melinda Patrician, Director, AGC Education and Research Foundation, to discuss your options at 703.837.5342 or patricianm@agc.org.
